About us

Innovating Interiors with Acrylic Elegance

MAK'S Acrylic Laminates is a company known for its exceptional range of decorative acrylic laminates, offering limitless possibilities for modern interior applications. Designed to enhance a wide variety of spaces, including furniture, wall panels, kitchens, bathrooms, healthcare facilities, commercial spaces, and hospitality environments, MAK'S Acrylic Laminates has quickly become a trusted name in the market.

Over the years, MAK'S Acrylic Laminates has earned a distinctive place by consistently introducing globally sourced, premium-quality laminates that combine style, performance, and durability. The product portfolio features an impressive selection of solid pastel colors, elegant glitter and pearl finishes, and luxurious marble-inspired designs available in both glossy and matt finish.

Driven by a commitment to excellence and customer satisfaction, MAK'S Acrylic Laminates continues to bring innovative surface solutions to elevate interior design standards across India and beyond.

MARBLE COLLECTION

Introducing Elegance That Lasts

Transform your interiors with our premium Marble Acrylic Laminates, the perfect fusion of style, strength, and sophistication. Designed to replicate the timeless beauty of natural marble, our laminates offer a luxurious surface solution without the high maintenance and cost.

Enhance Your Space with Elegance

Whether you're designing a modern home or a luxury commercial space, our Marble Acrylic Laminates bring unmatched visual appeal and functionality. Choose from a wide range of colors and patterns to suit your style.

REASONS FOR AIR BUBBLE FORMATIONS ON ACRYLIC SHEETS

To avoid delamination / air bubbles in between surface laminate and plywood (or any other suitable substrate) the below points need to take care of it.

Acrylic are bonded in extremely humid conditions

synthetic resin adhesive any other the PEVA (Polyethylene Vinyl Acetate Co-polymer)

When substrate loses moisture after installation

Debonding in certain areas because of uneven substrate surface

Insufficient or lack of pressing during the bonding period of laminate

Use of extremely large acrylic laminate sheets (more than 8 ft x 4 ft long)

CAUSES OF YELLOW PATCHES AND COLOUR FADING AFTER INSTALLATION:

Exposure to direct sunlight can gravely affect a laminate's appearance

Sub-standard dipped plywood or lipping patti may react with adhesive.

The use of synthetic rubber adhesives such as SR/Jat Pat, Bostic, Heatx, etc.

Prolonged exposure to high temperature (above 30°C-C)

If hot cookware or utensils are directly placed on the laminate

CAUSES OF CRACK LINES OR STRETCH LINES IN ACRYLIC LAMINATE SHEETS.

To avoid the inside cracks & stretch line **Do not store acrylic sheet in roll form.**

Please open the roll immediately. Do not pressurize while opening roll

Shake it well and light spray on the surface

Wipe the surface clean using a light circular motion

Ways To Prevent Acrylic Laminate From Color Fade Or Yellowing

- Do not expose your Acrylic Laminates furniture to direct sunlight, it may cause discolouring, fading and yellowing of the laminates.
- Don't use inferior quality chemical dipped plywood as it can react with adhesive which may cause yellow patches after the installation.
- Don't use synthetic rubber (S.R.) adhesive for bonding as it may lead to brown/colored patches on Acrylic Laminates.
- Don't place hot cookware directly on the Acrylic Laminates.
- Prolonged exposure of Acrylic Laminate above 30-degree temperature should be avoided.

Follow some steps mentioned as below to maintain Acrylic Laminates.

- To clean the surface of Acrylic Laminates do not use thinner.
- Wipe the surface gently with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solutions as these may damage the surface of the laminates.
- Use mild household glass cleaner to remove more stubborn stains.
- You can use normal water also for cleaning.
- Do not place hot cookware directly on the Acrylic Laminate.

How To Apply

- Use balancing sheet on backside.
- Always clean the dust particles properly from the substrate (plywood, MDF, Particle Board) surface by cloth or soft brush.
- Always use good quality branded adhesive to stick Acrylic Laminate on substrate. Please don't add water in adhesive before using it.
- Spread the adhesive uniformly by brush, roller or adhesive spreader on Acrylic Laminate and base substrate (Plywood, MDF, Particle Board).
- It is necessary to remove the air between Acrylic Laminate and substrate. Please leave minimum 2mm of groove between two pieces of Acrylic Laminate.
- At the time of pressing Acrylic Laminate on base substrate (Plywood, MDF, Particle Board) always use soft pinch roller or normal pressing technique to protect surface from any damage.
- The pressing should be done from the middle of the panel and move towards to the sideline and corners of the panel.
- For better bonding of Acrylic Laminate on substrate, press it for minimum 12 to 15 hours.
- Peel off the protective film within 15 days of installation.

UNDERSTAND 6H SURFACCE

The term "6H Surface" refers to a level of hardness based on the pencil hardness scale, where "H" denotes hardness. A 6H rating indicates a high level of scratch resistance, equivalent to that of a 6H pencil. This means the surface is highly resistant to scratches, offering enhanced durability. Such high scratch resistance is especially desirable in premium materials, and 6H-rated acrylic is considered a top-quality option. It is widely used in applications like furniture, cabinetry, and kitchen surfaces, where long-lasting and scratch-resistant finishes are valued.

Parameters	MAK'S Acrylic Laminate	High Gloss Laminate Mica	PU Coating / Duco Paint	Back Painted Glass
